La precisione nel controllo della frenata importantissima è in qualsiasi frangente nelle competizioni ad alto livello. La perfetta percezione della pressione esercitata e della conseguente risposta frenante conferiscono la sicurezza necessaria per affrontare i tracciati più impegnativi in strada e su pista. Il kit tubi freni ACCOSSATO è assemblato secondo precise specifiche in modo da garantire le prestazioni necessarie.

I Tubi freno ACCOSSATO sono omologati con omologazione DEKRA 201126026

I nostri tubi in acciaio intrecciato dotati di anima in Teflon e di raccordi in acciaio inox, eliminano l'effetto gommoso dell'impianto frenante che si verifica normalmente in condizioni di utilizzo sotto sforzo prolungato assicurando la massima efficienza proprio quando è più necessario.

L'impiego di acciaio inox sia nella fabbricazione della treccia metallica interna, che dei raccordi, garantisce un incomparabile resistenza sia alla corrosione che all'abrasione.

I tubi freno ACCOSSATO sono disponibili con guaina di diversi colori. Ordinare un kit tubi freno semplice, cercate la marca, il modello e l'anno sulle pagine che seguono. Sono disponibili 3 tipi di configurazioni:

- ❶ S - Standard: stesso sviluppo dei tubi come da configurazione originale;
- ❷ F - Diretto: ogni tubo connette direttamente la pompa freni a ciascuna pinza sia anteriore che posteriore;
- ❸ O - Sopra il parafrangente: il tubo anteriore connette la pompa freni alla pinza anteriore destra mentre un altro tubo collega la pinza destra a quella sinistra passando sopra il parafrangente.

I kit tubi ACCOSSATO utilizzano, raccordi in acciaio e sono dotati di tutto l'occorrente per il montaggio come viti di raccordo in acciaio e rondelle in rame, oltre ad alcuni adesivi e al MANUALE D'ISTRUZIONE

ACCOSSATO offre anche raccordi in acciaio inox colorati. Questi raccordi vengono colorati tramite un processo di bagno galvanico che assicura una colorazione uniforme, una tonalità brillante, una protezione eccellente ai raggi ultravioletti, difetto a cui sono invece soggetti i raccordi in alluminio o ergal.

The braking precision is very important during any high level competition. The perfect perception of the pressure applied and of the resulting braking response, will give the pilot the confidence necessary to deal with the most challenging tracks and streets. The Accossato's kits are assembled according to precise technical specifications in order to ensure the required performances. Are DEKRA homologated, Nr. 201126026. These brake lines are made of steel, with the inside of fluoropolymer and stainless steel fittings, they avoid the "fading" effect (progressive loss of braking efficiency), that it usually occurs in conditions of sustained effort. The usage of the stainless steel in the production of the internal material and of the fittings, ensures an excellent resistance to both abrasion and corrosion. Our fittings give a good connection, are lighter and safer than our competitors'. We do not have individual components prices, because we only sell them as a kit (front and rear).

The Accossato brake lines are available with covers of 18 different colors: black - blue - carbonlook - transparent - dark blue - lime green - blue neon - orange - pink - purple - red - bright red - grey - yellow - white. The fittings are UV resistant, are available in different colors (gold - red - blue - natural - green and black) and avoid all the problems related to the usage of fittings made in ergal or aluminium. It offers a big range of choice without compromise the safety. Purchasing a set of brake lines is very easy: find the brand, the model and the year on the following pages.

There are three different configurations:

- ❶ S - Standard: same brake lines as for the original configuration;
- ❷ F - Full-length: every brake lines connect the master cylinder to each brake caliper, front and rear;
- ❸ O - Over the mudguard: the front brake line connects the master cylinder to the right rear brake caliper, while another brake line connects the right rear brake caliper to the left one, by passing through the mudguard.

The brake lines kits can be mounted as the customer prefers, with stainless steel or titanium fittings and they are supplied with all the needed parts for the assembly, such as screws and copper washer. Warranty card and stickers are also supplied.

NOVITÀ

AGFR0 TRECCIA AL METRO

AGFRX1 KIT TUBI FRENO PER SUPER TENERE' 1200 10-13

TUBI MODULARI MODULAR SYSTEM

Un nuovo sistema esclusivo Accossato Racing per l'utilizzo dei tubi in treccia che da la possibilità ai rivenditori di avere un ridotto stock dando la possibilità di soddisfare tutte le esigenze dei propri Clienti. I tubi sono disponibili nelle varie lunghezze con già fissato il supporto nel quale andrà avvitato il tipo di raccordo scelto, con l'esclusivo sistema "Accossato Modular System" viene garantita la massima qualità ed affidabilità del sistema.

Il tubo in treccia Accossato Racing è disponibile in 18 diverse colorazioni e non sono soggetti a degrado dovuto dall'invecchiamento non subendo alcuna diminuzione prestazionale con il passare del tempo in quanto le caratteristiche tecniche del tubo garantiscono una durata praticamente illimitata.

ISTRUZIONI DI MONTAGGIO:

1. Fissare i raccordi in morsa senza rovinare il piano degli occhielli
2. Avvitare la ghiera sul raccordo applicando una coppia di serraggio da 19 N/m a 24 N/m

An exclusive new Accossato brake line system, which gives the possibility to the dealers to reduce the stock and meanwhile to satisfy all the customers' needs. The brake lines are supplied in various lengths and it is already included the connection, the customer just has to screw the chosen banjo on it, with the exclusive "Accossato Modular System" ensures the best quality and highest safety.

The Accossato Racing brake line is available in 18 different colors. They are not subjected to wear over time, since they do not deteriorate over the years and their potential does not change, due to its technical characteristics which can guarantee an almost illimitate duration over time.

MOUNTING INSTRUCTION:

1. Clamp the fitting in the vice and be careful not to damage the banjo surface
2. Screw the ring nut on the fitting applying applying a tightening torque from 19 N/m to 24 N/m
